

I FEEL GOOD
IN MY BUBBLE

The big AIR

Nothing surpasses camping under the tent to get closer to nature. If the tent is still today the most simple and economical shelter, it doesn't suit those who do not like camping the hard way !

It is for them that we created the inflatable tent Cosy Bubble. Forget the tents where space is limited. No more tents with the poles that must be assembled, which break or fly in the wind ! No more tents of traditional canvases where water and insects infiltrate briskly.

Opt for the Cosy Bubble Positive Air Tent. Designed by outdoor enthusiasts, Cosy Bubble offers you more than a canvas shelter but a spacious, enveloping and soothing living space. Equipped with an ultra quiet wind tunnel, you have no frame to mount. Easy to store in the car, it inflates in less than 10 minutes!

Camping in the tent has never been so enjoyable !

Design inspired by nature

The design of the Cosy Bubble tents is justified first of all by the pleasure felt in the contemplation of the curves that one finds in nature. Their curves express by their biological resemblances a softness absent from our traditional shelters. A sphere does not lock us up like a cube, it materializes our bubble, our self. Curved volumes have very particular properties: they create an impression of scale and indefinable space. Our customers immediately feel a sense of well-being inside. The light by illuminating a curve produces a « gradient » that naturally evokes softness, creating an impression of welcome and comfort.

Canadian quality

Our products are made in Canada by a qualified team dedicated to providing impeccable products that meet the expectations of our most demanding customers. The consistency of design, shapes and materials make them high-end tents that will go through the test of time.

Outdoor accommodation

Give your visitors innovative glamping outdoor accommodation for an unforgettable vacation close to nature. Spacious and bright, our sleek bubble tents are installed in minutes and blend in with the environment.

Comfort, luxury and well-being

Cosy Bubble offers you well-being, comfort and luxury in an ecotourism context. Glamping is a growing trend all over the world and attracts those who seek proximity to nature without lugging their equipment and want to experience something different from the traditional hotel but without sacrificing comfort.

Yesterday to today

Pierre Jutras created his first inflatable tent in Longueuil with his wife on the kitchen table in the 70's. Passionate about the outdoors, he camped with his family with his trailer tent. Noting that electricity was more and more common on campsites, he came up with the idea of creating a positive air pressure tent that would offer much more space and light than a traditional tent, and above all that would be more compact and affordable than a tent trailer. Later, his two daughters adopted it to camp with their family all over Quebec from Abitibi to the Magdalen Islands! In 2015, wanting to share their innovation, Pierre Jutras and his two daughters Dominique and Marie-Claude founded Cosy Bubble.

Welcome to Cosy Bubble

Our 3,500 sq. ft. Manufacturing facility is located in the Boucherville Industrial Park on the south shore of Montreal near major highways. Come meet us !

EVERYBODY TALKS ABOUT IT...

*Ariane Nadeau
Magdalen Islands*

I loved my experience ! It is a unique accommodation. After a busy day, what a joy to discover the comfort of his bedroom, and this, in the heart of nature ! The windows allow to admire the landscape while remaining well nestled in the hollows of the covers. There is a lot of space inside. Fans of affordable luxury camping, the Cosy Bubble is for you !

Montréal*

I really enjoyed the experience in Cosy Bubble at Pohenegamook. We do not suffocate as in a tent, for air is constantly pulsating and, a great asset for me, the mosquitoes can not get in, wouhou !

*Susan Reid
Montreal*

We had a great weekend with our bubble! It is so big it has an echo, so comfortable- spacious, warm at night and no worries about the rain or bugs! Even our dog quickly learned how to get in and out. Easy to set up :)

Innovation and commitment

POSITIVE AIR PRESSURE TENT

- 180 sq.ft. To 250 sq. ft and customized according to your needs
- No pole to assemble – continuous airflow
- No insect and allergenic material inside
- Very high resistance to wind
- Easy to store (30 kg)
- Electric blower (1.2 amp) 150 watts
- Inflates in 10 minutes!

COMMIT TO THE FUTURE

Because it is important for us to preserve the environment for the generations that follow, we give 1% of each tent sold to **Arbre-Evolution**, a socio-environmental organization that offers a carbon offset service through reforestation projects and offers diversified services involving communities in Quebec and elsewhere in the world.

Your only destination for tents of distinction
